Make the most of our courier management software that's designed to enhance productivity like never before.

Our Transport Management System

WHY OUR TRANSPORT MANAGEMENT SYSTEM FOR MULTI-MODE TRANSPORTATION?

Our transport management software is a comprehensive system that empowers your business with state-of-the-art features and functionality including but not limited to:

1

SOFTWARE REPORTING AND DASHBOARDS

Powered with an intuitive interface, our transport management system offers configurable TMS system dashboards to simplify data access.

2

PORTALS FOR IMPROVED VISIBILITY

Interact with all partners like never before. Courtesy: a wide array of portals that make communication uber-easy by overcoming barriers.

3

SEAMLESS INTEGRATION

Experience improved efficiency and simplify workflow on multiple fronts & make finance management a breeze. From invoicing to credit management, & freight audits.

4

PLANNING OPTIMIZATION

Another intuitive and ultra-advanced feature that makes a difference while delivering an order.

5

BETTER SUPPLY-CHAIN VISIBILITY

Improve your supply-chain visibility by a significant margin as you get more visibility. With real-time updates, the monitoring capabilities.

6

AUTOMATION

Gone are the days when you needed manual intervention for a wide array of tasks including quotation, shipment tracking, delivery, and even updates.

PRODUCT MODULES //

TASK MANAGEMENT

It helps individuals & business effectively organize their tasks. With a simple to use interface, users can begin scheduling, assigning & creating tasks in minutes.

RECRUITMENT MANAGEMENT

A recruitment management system is a set of modules to help you in staffing and recruitment operations automatically.

LEAVE MANAGEMENT

It helps to maintain both manual credit and debit entry of leaves and update the current balance of leaves. It can also keep a track of leave encashment and consider excess leaves a loss of pay.

ATTENDANCE MANAGEMENT

It provides a feature to keep a record of attendance inside the system eliminating manual effort consuming tasks. It is also linked with the school academic year.

PAYROLL MANAGEMENT

It helps individuals & business effectively organize their tasks. With a simple to use interface, users can begin scheduling, assigning & creating tasks in minutes.

CRM

The module allows an organization to manage its relations with the customer in a structured manner.

BANKING MODULE

Helps the organization in managing its all banking services such as fund transfers, account opening, passbook management, etc from the ERP itself.

ADMIN MODULE

it allows the system administrator to set up the back-end of the system and perform basic system configuration, mainly the definition of predefined drop-down fields, etc.

TAXATION MANAGEMENT

This module provides organizations with centralized tax configuration, management, and reporting with the integration of the accounting module.

PRODUCT MODULES

SALES MANAGEMENT

This module is used to perform the operation and document-based tracking of all sales transactions.

VOUCHER MANAGEMENT

The process of creating a payment or receipt voucher is an essential function for many businesses this module helps streamline and automate these processes.

SOCIAL MEDIA MANAGEMENT

The module helps in managing different social media accounts on a single platform with BI-based dashboards and customized reports.

EMPLOYEE PROFILE MANAGEMENT

The module helps the organization to automate their current employee profiling system in a more structured way for better record access and decision making.

PERFORMANCE MANAGEMENT

It enables managers to track and monitor the performance of individual employees as well as departments, and the overall organization.

CONFERENCE MODULE

The module helps in conducting, scheduling, and monitoring video conferences both within & outside the organization.

VISITOR MANAGEMENT

It helps in controlling, monitoring, and maintaining the visitor's flow with a systematic and accurate database to access.

EMPLOYEE MONITORING MODULE

The module helps in monitoring employee working both inside & outside office premises by screen record, IoT tools, video recording, etc.

APPROVAL MANAGEMENT

The module digitalizes and automates your current approval mechanism for quick & structured decision making.

PRODUCT MODULES //

TRANSPORT MANAGEMENT

Monitors the entire life cycle of transportation

FLEET MANAGEMENT

Efficiently manages & handles any size depot

REPORT

Easily manages, data & customer interactions

ACCOUNT MANAGEMENT

Stores, manages & tracks content repository

CARGO365 CLOUD MODULES

FREIGHT FORWARDING

Accelerates processed & handles shipment needs

DATABASE MANAGEMENT

Generates & maintains quotation

Which increase productivity without hurting the pocket

5

FUTURE READY TECHNOLOGY

To address changing business scenarios

PRODUCT MODULES

Cargo 365's transportation system is a perfect solution for shippers, manufacturers, distributors, and 3 PLs (3rd party logistics providers). Owing to its ultra-advanced features plan and execute critical shipment processes by eliminating redundant processes that would hinder your overall performance. Comprising of a myriad of modules such as a warehouse management system, courier management system, fleet management system, and inventory management system to name a few.

01

ORDER MANAGEMENT

Manage transport requests quite easily with hassle-free access to order information to planners, customers, and drivers. Intuitive dashboards also help manage the workload of the day.

Our transportation management system's rate engine is a wonderful tool that automatically calculates transportation rates for truckload, intermodal shipping, LTL, and parcel.

SHIPMENT COST MANAGEMENT

02

03

FLEET MANAGEMENT

Operating your fleet becomes a breeze as you can easily manage dispatch and financial settlements. Our transport management system allows you to harness your assets on a single platform.

Scheduling dock appointments is a tedious and time-consuming process, but not when you have Cargo 365's transportation management system at your disposal.

DOCK APPOINTMENT SCHEDULING

04

05

ROUTE ANALYSIS

Optimize your routing activities with our transport management system that's pretty much self-sufficient. Powered by ultra-modern algorithms, our TMS can automatically calculate the best routes for you.

CUSTOMIZATION & DEPLOYMENT //

Deployment Type we Offer

Dedicated Server:

It offers immense power and flexibility, but usually comes at a premium. Your options here could include an upgrade to a virtual private server (VPS) or a dedicated one.

Cloud:

Working in cloud-based environments makes it easy to create and build towards establishing a high degree of integrated functionality plus the deployment is much simpler, faster and less expensive as no on-site infrastructure is required.

Own Premises:

Its best for those who don't prefer internet glitches and the entire solution is deployed on a static IP hence zero dependency on third party servers.
