ABOUT EDII

PRIDE IN OUR WORK

The Entrepreneurship Development Institute of India (EDII) is a nationally and internationally recognised institution dedicated to promoting entrepreneurship education, research, training, and institution building.

EDII works with students, academicians, entrepreneurs, government bodies, and international agencies through its Academic Wing and Institute Wing, offering programs, research initiatives, publications, and advisory services.

OVERVIEW

EDII required a modern, dynamic, and content-driven website that could effectively represent both its Academic Wing and Institute Wing while catering to a wide range of stakeholders.

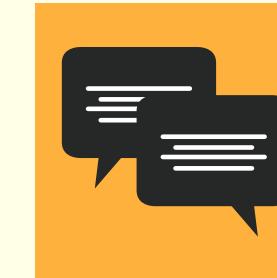

We partnered with EDII to design and develop a dynamic website platform (<https://ediindia.org/>) that delivers structured, easily manageable, and scalable digital content for academics, students, researchers, policymakers, and institutional partners.

The website was designed to:

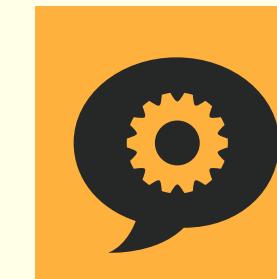

- Clearly differentiate Academic and Institute wings
- Present programs, courses, research, and initiatives effectively
- Enable easy content updates by internal teams
- Improve accessibility, usability, and navigation
- Strengthen EDII's digital identity and outreach

The solution ensures a future-ready digital presence aligned with EDII's stature as a premier national institution.

PAIN POINTS FOR EDII

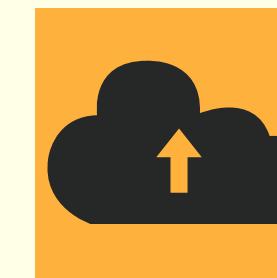

Static or outdated content presentation

Difficulty managing frequent academic and institutional updates

Lack of clear segregation between academic and institute information

Complex navigation for diverse user groups

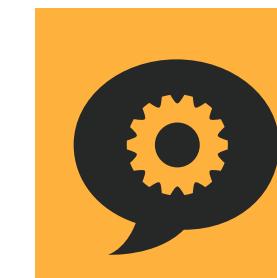

Limited scalability for new programs, research, and initiatives

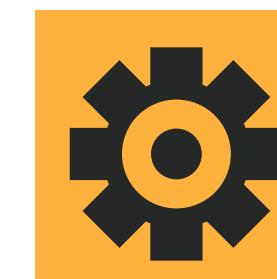

OUR SOLUTIONS FOR EDII

Structured presentation of academic programs and courses .

Faculty profiles, research areas, and publications

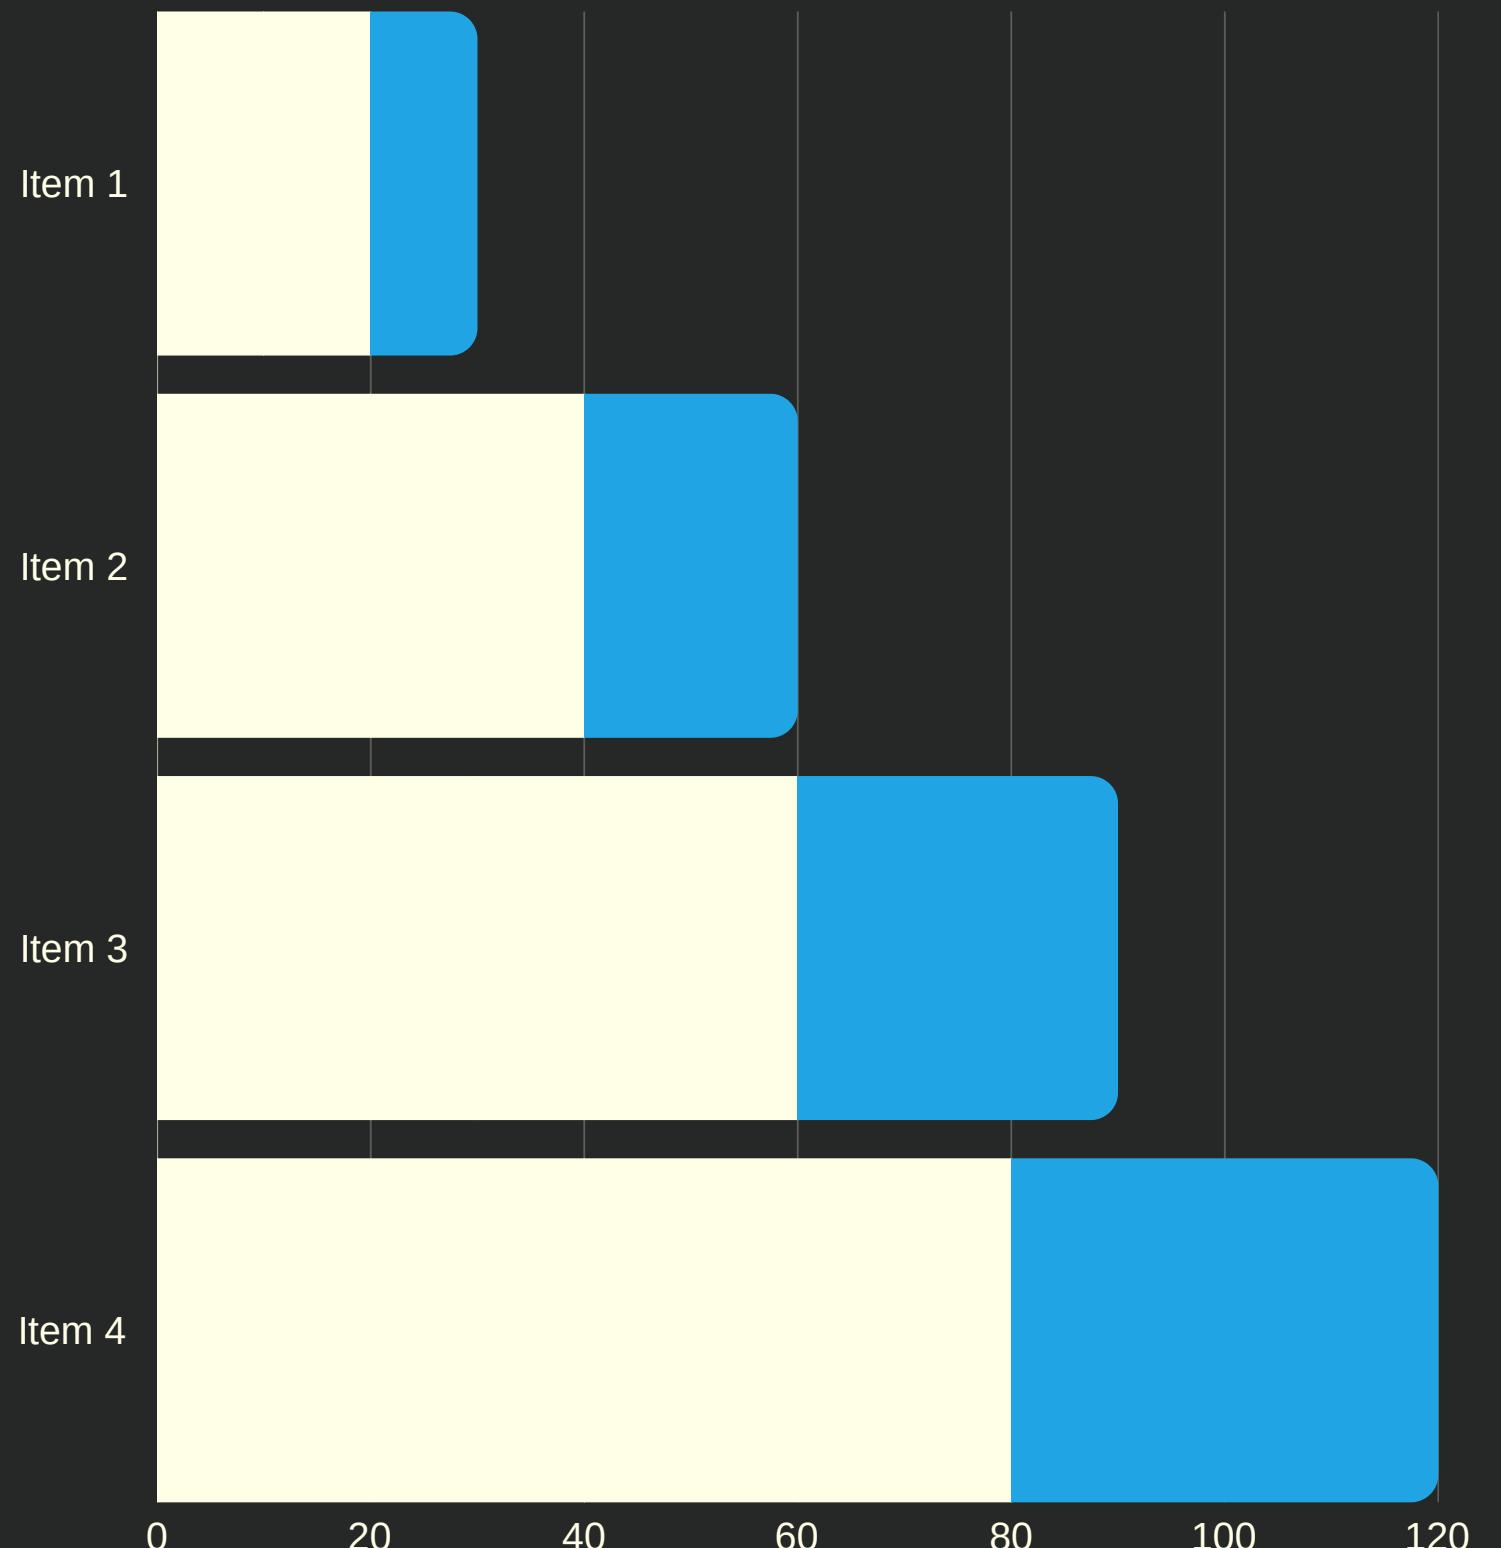

Showcase of institutional initiatives, events, and collaborations

Responsive design for desktop, tablet, and mobile devices

Optimised performance for faster load times

FACTS & FIGURES

- Dynamic Website Architecture improved content update efficiency by **60%**.
- Optimized Navigation and UX improved user engagement by **45%**.
- Automated Forms and Data Capture reduced inquiry processing time by **55%**.
