PRODUCT MODULES

CATEGORY MANAGEMENT

It involves applying the end-to-end procurement process to a specific range of products. This involves pre-award processes such as category analysis and demand management, sourcing and contract negotiation.

CUSTOMER MANAGEMENT

Comprehensive tools that allow you to customize prices, billing and services to satisfy customer's specific needs. Client management also includes contract billing, sales tracking, electronic notifications, invoicing and much more.

PAYMENT MODULE

It allows your customers to pay with Visa, MasterCard, and American Express, just to name a few, and they won't even have to leave your site to do so. Refunds are also supported via a terminal form.

INVENTORY MANAGEMENT

It enables inventory control by tracking item quantities and location down to individual SKUs and offers a complete picture of not only current but also incoming inventory, through an integration with the procurement tool.

MARKETING AUTOMATION

Like with ecommerce, certain software providers have developed a marketing automation module. A marketing module manages marketing campaigns across digital channels like email, web, social media and SMS.

BRAND & CONTENT MANAGEMENT

It enables ecommerce shop owners to create, edit and publish digital website content. It comes with some crucial ecommerce capabilities like product inventory management, shopping cart, shipping and payment gateway integrations.

PRODUCT MODULES

TASK MANAGEMENT

It helps individuals & business effectively organize their tasks. With a simple to use interface, users can begin scheduling, assigning & creating tasks in minutes.

RECRUITMENT MANAGEMENT

A recruitment management system is a set of modules to help you in staffing and recruitment operations automatically.

LEAVE MANAGEMENT

It helps to maintain both manual credit and debit entry of leaves and update the current balance of leaves. It can also keep a track of leave encashment and consider excess leaves a loss of pay.

ATTENDANCE MANAGEMENT

It provides a feature to keep a record of attendance inside the system eliminating manual effort consuming tasks. It is also linked with the school academic year.

PAYROLL MANAGEMENT

It helps individuals & business effectively organize their tasks. With a simple to use interface, users can begin scheduling, assigning & creating tasks in minutes.

CRM

The module allows an organization to manage its relations with the customer in a structured manner.

BANKING MODULE

Helps the organization in managing its all banking services such as fund transfers, account opening, passbook management, etc from the ERP itself.

ADMIN MODULE

it allows the system administrator to set up the back-end of the system and perform basic system configuration, mainly the definition of predefined drop-down fields, etc.

TAXATION MANAGEMENT

This module provides organizations with centralized tax configuration, management, and reporting with the integration of the accounting module.

PRODUCT MODULES

SALES MANAGEMENT

This module is used to perform the operation and document-based tracking of all sales transactions.

REPORT MODULE

Report Module helps the user to create the predefined and customized report as per requirements. It leaves a loss of pay.

PERFORMANCE MANAGEMENT

It enables managers to track and monitor the performance of individual employees as well as departments, and the overall organization.

EMPLOYEE MONITORING MODULE

The module helps in monitoring employee working both inside & outside office premises by screen record, IoT tools, video recording, etc.

SOCIAL MEDIA MANAGEMENT

The module helps in managing different social media accounts on a single platform with BI-based dashboards and customized reports.

VISITOR MANAGEMENT

It helps in controlling, monitoring, and maintaining the visitor's flow with a systematic and accurate database to access.

EMPLOYEE PROFILE MANAGEMENT

The module helps the organization to automate their current employee profiling system in a more structured way for better record access and decision making.

ACCOUNTING MODULE

It automates financial and accounting activities. It collects information and crafts reports: general ledgers, fixed assets, receivables, payable, cash flows, etc.

APPROVAL MANAGEMENT

The module digitizes and automates your current approval mechanism for quick & structured decision making.

INDUSTRY PROCESS & SOLUTION

CUSTOMIZATION & DEPLOYMENT

DEPLOYMENT TYPE WE OFFER

CONSULT

Consult with the internal or external team running point on the project to map out the exact journey your IoT deployment will take, would include sub-stages from feasibility test to ROI calculation.

DEVELOP

Here's where boards get developed, the cloud platform gets built out and the analytic framework is set. It's also when all the business relevant features are configured from analytic, artificial intelligence (AI) and machine learning.

DEPLOY

Here's where forward stocking for backup hardware, technical customer support, and tech support for Wi-Fi or cellular networks, gateways, web interfaces, apps and your new cloud platform all come into play.
