

MANUFACTURING RELATIONSHIPS **DISTRIBUTING TECHNOLOGY**

Mfg365cloud TM

"Technology With Integrity"

ABOUT PRODUCT

ABOUT MANUFACTURING365CLOUD

Manufacture, demand and supply are three major activities of any manufacturing industry. Once a product is manufactured, it needs to be delivered to a prescribed destination or hub and stored. Now, all this data must be interlinked, which is the prime motive of mfg365cloud. Whether it is planning, developing, sales forecasting or any other important business operation for a manufacturing business, we assist in everything. Manufacturing365cloud is designed in such a way that after the integration it provides a cross-sectional view of whole operation which eventually deducts the chances of errors and contributes in taking better decisions.

ABOUT CITTA

Citta was founded in 2009 with a mission to succeed by helping our clients succeed. Citta's mission is to create effective and cutting-edge solutions, helping clients maximize their reach online and offline. Citta believes in staying relevant by continuously evolving itself to reach the highest level of excellence. Our solutions are one of the most advanced and pertinent ERP Systems across the globe. We have expertise in providing all kinds of Consultancy, Technology & Outsourcing Services with a proven track record.

PRODUCT MODULES

TASK MANAGEMENT

It helps individuals & business effectively organize their tasks. With a simple to use interface, users can begin scheduling, assigning & creating tasks in minutes.

RECRUITMENT MANAGEMENT

A recruitment management system is a set of modules to help you in staffing and recruitment operations automatically.

LEAVE MANAGEMENT

It helps to maintain both manual credit and debit entry of leaves and update the current balance of leaves. It can also keep a track of leave encashment and consider excess leaves a loss of pay.

ATTENDANCE MANAGEMENT

It provides a feature to keep a record of attendance inside the system eliminating manual effort consuming tasks. It is also linked with the school academic year.

PAYROLL MANAGEMENT

It helps individuals & business effectively organize their tasks. With a simple to use interface, users can begin scheduling, assigning & creating tasks in minutes.

CRM

The module allows an organization to manage its relations with the customer in a structured manner.

BANKING MODULE

Helps the organization in managing its all banking services such as fund transfers, account opening, passbook management, etc from the ERP itself.

ADMIN MODULE

it allows the system administrator to set up the back-end of the system and perform basic system configuration, mainly the definition of predefined drop-down fields, etc.

TAXATION MANAGEMENT

This module provides organizations with centralized tax configuration, management, and reporting with the integration of the accounting module.

PRODUCT MODULES

SALES MANAGEMENT

This module is used to perform the operation and document-based tracking of all sales transactions.

VOUCHER MANAGEMENT

The process of creating a payment or receipt voucher is an essential function for many businesses this module helps streamline and automate these processes.

CONFERENCE MODULE

The module helps in conducting, scheduling, and monitoring video conferences both within & outside the organization.

EMPLOYEE PROFILE MANAGEMENT

The module helps the organization to automate their current employee profiling system in a more structured way for better record access and decision making.

PERFORMANCE MANAGEMENT

It enables managers to track and monitor the performance of individual employees as well as departments, and the overall organization.

STOCK MANAGEMENT

It provides you the information about the current stock for individual items between different departments and branches across the organization.

VISITOR MANAGEMENT

It helps in controlling, monitoring, and maintaining the visitor's flow with a systematic and accurate database to access.

EMPLOYEE MONITORING MODULE

The module helps in monitoring employee working both inside & outside office premises by screen record, IoT tools, video recording, etc.

APPROVAL MANAGEMENT

The module digitalizes and automates your current approval mechanism for quick & structured decision making.

PRODUCT MODULES

INVENTORY AND WAREHOUSE MANAGEMENT

Get the tools to help you efficiently manage the entire sales process and customer lifecycle – from initial contact to final sale. Increase sales and improve customer satisfaction.

PURCHASING & PROCUREMENT

A systematic approach to managing the procurement process, the complete order-to-pay cycle. Compare suppliers and prices to negotiate better deals and identify opportunities for cost savy.

SUPPLY CHAIN MANAGEMENT

Accelerate product introductions and maintain agile shop floor execution to deliver intelligent order fulfillment.

ACCOUNTING & FINANCIAL MANAGEMENT

Speed up transactions and improve visibility into cash flow, by integrating your financial operation in real time with business processes, such as purchase and sales.

PRODUCTION MANAGEMENT

Automate production processes and eliminate complexities to maximize business productivity and meet demands on time. Our module works on PMCA model - Produce, Monitor, Control & Analysis

VENDOR MANAGEMENT

The module documents every quotation from your suppliers and maintains records of their quality standards certifications. It enables you to use the data for rating the suppliers and improve quotation management in the future.

SOCIAL MEDIA MANAGEMENT

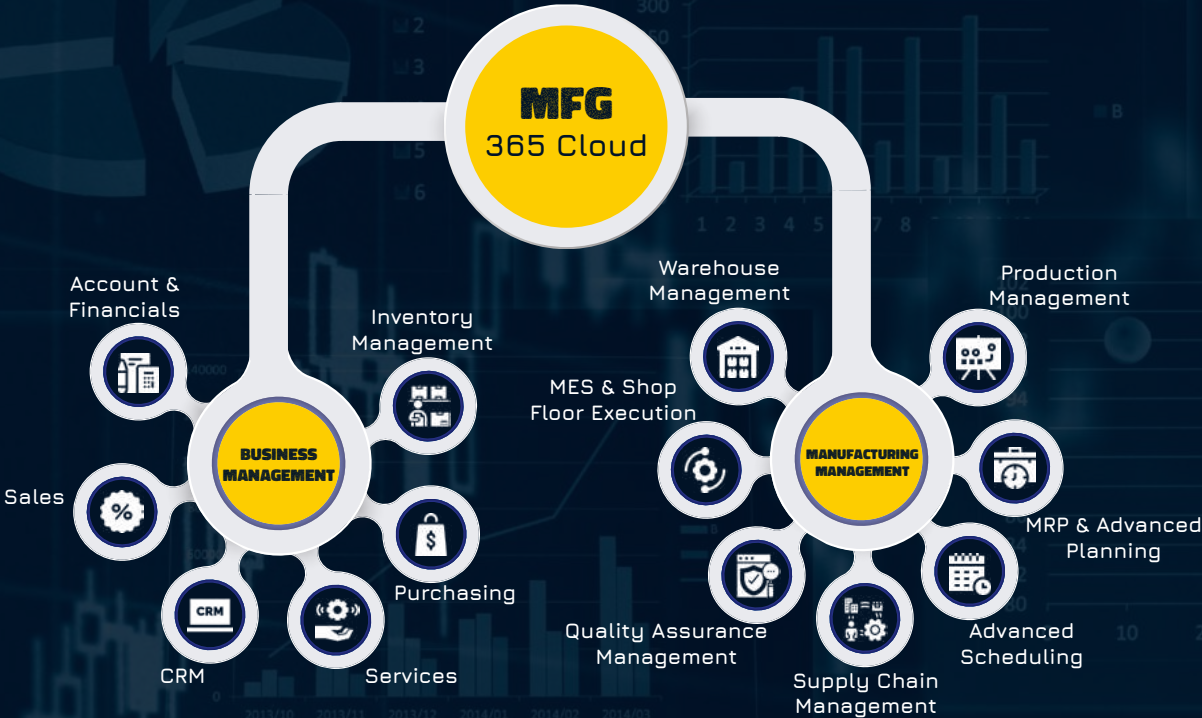

The module helps in managing different social media accounts on a single platform with BI-based dashboards and customized reports.

EMAIL MANAGEMENT

The module helps in the auto mailing system and aims to help the system administrator record & control outgoing emails.

INDUSTRY PROCESS & SOLUTION

1 INTEGRATED SYSTEMS

Move from individual setups to a connected solution

3 END TO END VISIBILITY

To analyse & upgrade the efficiency of entire process

4 ASSET LIGHT TECHNOLOGY

Which increase productivity without hurting the pocket

2 MULTIPLE DEPLOYMENT APPROACH

To create a solution satisfying your environment

5 FUTURE READY TECHNOLOGY

To address changing business scenarios

PRODUCT FEATURES

- Bill of Materials and Routing
- Master Production Scheduling
- Planning & Scheduling
- Capacity Requirements
- Material Requirements
- Automated Data Collection
- Integration with Plant Floor Machinery
- Mobile Access to Data
- Cloud based ERP
- OCR Integration
- BI-Powered Analytics/Reports
- Payment Gateway
- Chatbots
- Inter Branch Synchronization
- IoT Integration
- 3rd Party ERP Integration
- RFID & Barcode Integration
- AI & BI based Dashboards

PRODUCT BENEFITS

89%

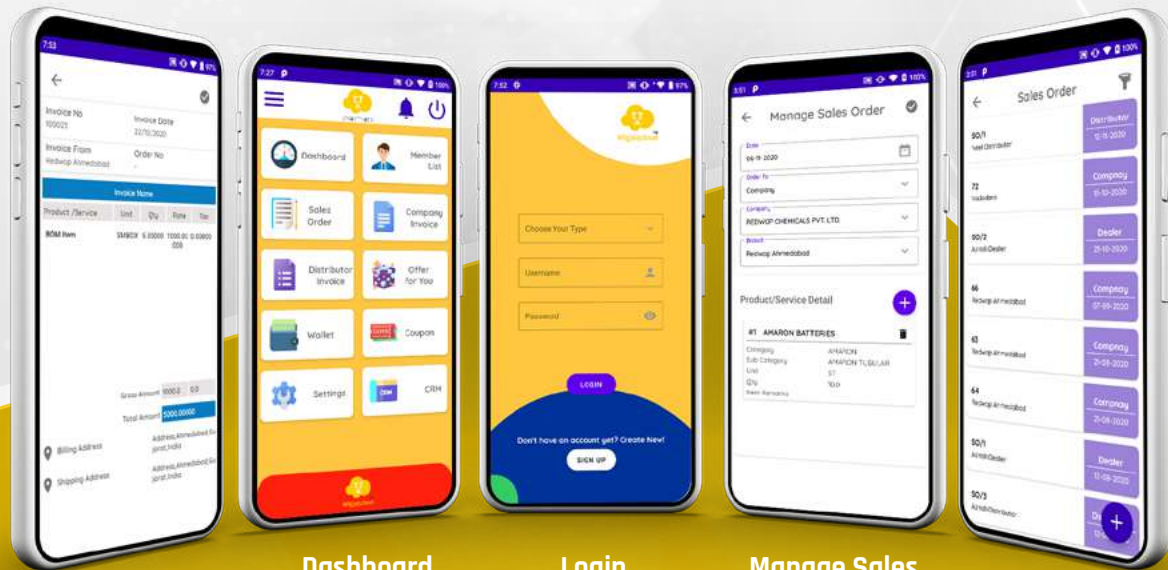

In a survey of 255 companies looking to purchase ERP software, 89% identified accounting as the most critical ERP function.

- Panorama

MOBILITY

A handy and simple to access, manufacturing mobile application is the primary method to increase a production business's productivity. Not just this, a manufacturing app can track analytics, help representatives to cooperate real-time, give access to refer to the production floor right away.

CUSTOMIZATION & DEPLOYMENT

DEPLOYMENT TYPE WE OFFER

DEDICATED SERVER

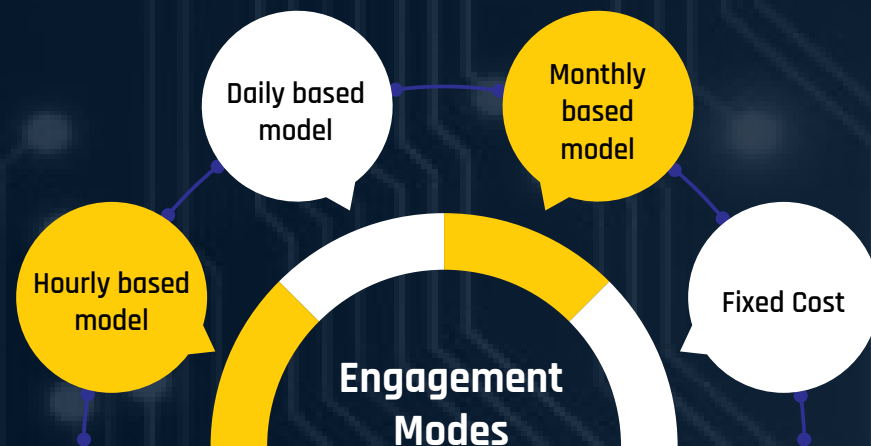

It offers immense power and flexibility, but usually comes at a premium. Your options here could include an upgrade to a virtual private server (VPS) or a dedicated one.

CLOUD

Working in cloud-based environments makes it easy to create and build towards establishing a high degree of integrated functionality plus the deployment is much simpler, faster and less expensive as no on-site infrastructure is required.

OWN PREMISES

It's best for those who don't prefer internet glitches and the entire solution is deployed on a static IP hence zero dependency on third party servers.
